

Table 10.1. The vital statistics of some South African platinum mines .....	198
Table 10.2. Costs of new developments in the Bushveld Complex .....	199
Table 10.3. Comparison of working costs for South African PGM mines .....	200
Table 10.4. Metal distribution and value (US\$) distribution in a recovery ton of the Merensky and UG2 layers in January and June 1993 .....	201
Table 10.5. A temporal supply and demand estimation for platinum plus palladium plus rhodium from 1989 to 2000 (in kilograms) .....	205

#### LIST OF ILLUSTRATIONS

Figure 2.1. The setting of the Bushveld Complex in the Kaapvaal craton .....	4
Figure 2.2. Geology of the western lobe of the Bushveld Complex .....	5
Figure 2.3. Geology of the eastern lobe of the Bushveld Complex .....	6
Figure 2.4. The informal stratigraphic subdivision of the Bushveld Complex .....	7
Figure 2.5. Cross-section of a typical pothole in the Merensky Reef .....	9
Figure 2.6. Geology of the Potgietersrus limb of the Bushveld Complex .....	15
Figure 2.7. Distribution of the <i>in-situ</i> PGM resources in areas of the Bushveld Complex to a depth of 1200 m .....	20
Figure 2.8. Percentage distribution of the individual PGM in South African ores .....	22
Figure 2.9. Generalized geological map of the Noril'sk-Talnakh area .....	24
Figure 2.10. Geological section through the north-western part of the Talnakh ore field .....	25
Figure 2.11. Typical section through the mineralized intrusion at Talnakh .....	27
Figure 2.12. Section through the Oktyabr'sk Mine .....	28
Figure 2.13. Distribution of the major ore types in the Talnakh deposit .....	30
Figure 2.14. Distribution of the PGM in the Noril'sk-Talnakh deposit of Russia .....	34
Figure 2.15. <i>In-situ</i> distribution of the PGM resources amongst the various mines of the Noril'sk-Talnakh deposit .....	34
Figure 2.16. Distribution of the PGM in the Finnish deposits .....	36
Figure 2.17. <i>In-situ</i> distribution of the PGM resources of the Finnish deposits to a depth of 1200 m .....	36
Figure 2.18. Geological map of the Stillwater Complex .....	41
Figure 2.19. Stratigraphy of the JM cyclic units, Stillwater Complex .....	42
Figure 2.20. Distribution of the PGM in deposits of Zimbabwe, the USA, and Canada .....	48
Figure 2.21. Distribution of the PGM in the deposits of China, Colombia, and the world's major deposits .....	54
Figure 2.22. Distribution of the PGM resources among the major countries of the world .....	60
Figure 2.23. Distribution of the <i>in-situ</i> PGM resources of the individual PGM among the major deposits of the world .....	61
Figure 5.1. Average distribution of international trade in the PGM, 1985-1989 .....	99
Figure 5.2. Average distribution of international trade in PGM-bearing waste, scrap, and raw ores or concentrates .....	101
Figure 5.3. PGM recovered from scrap and secondary materials in the USA, 1975-1992 .....	102
Figure 5.4. Holdings of platinum, palladium, and iridium by the General Services Administration of the US Government, 1950-1992 .....	105
Figure 5.5. PGM stocks held by refiners, importers, and dealers in the USA, 1975-1992 .....	106
Figure 5.6. World distribution of PGM in stockpiles, 1978 .....	107
Figure 5.7. Average annual price of platinum metals, 1910-1990 .....	110
Figure 5.8. Precious-metals prices, 1952-1992 .....	111
Figure 5.9. Price of ruthenium, iridium, and osmium, 1952-1992 .....	112
Figure 5.10. Average quarterly price of platinum metal on world markets, 1974-1992 .....	113
Figure 5.11. Average quarterly price of platinum metal normalized around the mean price, 1974-1992 .....	114
Figure 5.12. Average monthly precious-metal prices, January 1990-June 1993 .....	115
Figure 5.13. Average monthly precious-metal prices normalized around the mean price, January 1990-June 1993 .....	116
Figure 9.1. The fuel-cell process .....	184
Figure 10.1. Percentage demand for platinum, palladium, and rhodium by the major consuming areas in the Western World, 1986-1993 .....	192

#### LIST OF COLOUR PHOTOGRAPHS

*Between pages xvi and 1:*

Typical small-scale mineral layering associated with the PGM mineralization in the Bushveld Complex  
Type section of the Merensky Reef from the Rustenburg section of the Bushveld Complex  
Regional contact Merensky Reef overlying the footwall marker anorthosite at Zondereinde Mine

*Between pages 4 and 5:*

Polished section of regional contact Merensky Reef from the Zondereinde Mine  
The 'boulder bed', consisting of coarse-grained 'boulders' of feldspathic pyroxenite in layered mottled anorthosite  
The 'tennis-ball marker' near the base of the critical zone in the eastern Bushveld Complex

*Between pages 12 and 13:*

Thin layers of chromitite in anorthosite at Dwars Rivier, in the eastern lobe of the Bushveld Complex  
The LG6 (Steelpoort) chromitite layer in the Lydenburg district, eastern Transvaal  
Base of the UG1 chromitite at Rustenburg Platinum Mines

*Between pages 52 and 53:*

General view across the Stillwater complex, Montana  
The JM reef of the Stillwater Complex  
Aerial view of Zondereinde Mine, looking north towards the periphery of the Bushveld Complex

*Between pages 60 and 61:*

Western Platinum Mine  
The smelter and base-metal refinery at Western Platinum  
Shaft sinking at Sandsloot, in the Potgietersrus limb of the Bushveld Complex, 1925  
Opencast mining at Potgietersrus Platinum Mines

*Between pages 68 and 69:*

The Medvisi open pit at Noril'sk, Russia  
Massive sulphide ore underground at the Oktyabr'sk mine, Talnakh ore junction  
The copper smelter at Noril'sk-Talnakh  
Aerial view of part of Rustenburg Platinum Mines, showing incline shafts located along the suboutcrop of the shallowly dipping mineralization, and a vertical shaft sunk to exploit the reefs at depth

*Between pages 76 and 77:*

Shaft sinking at Western Platinum  
A blast in the open pit at Eastern Platinum

*Between pages 80 and 81:*

Drilling in a UG2 stope at Western Platinum Mine  
Decline to the mechanized section at Karee  
Chair lift for transporting personnel in an incline shaft, Rustenburg Platinum Mines

*Between pages 88 and 89:*

Shaft headgear at Karee  
Milling circuit at Zondereinde Mine, showing the primary semi-autogenous grinding mill and the secondary ball-mill  
Flotation cells for the recovery of PGM-bearing sulphide concentrate  
Tapping 'green' matte from the furnace  
Pouring slag from a converter

*Between pages 96 and 97:*

Furnace room in the chlorination plant for the treatment of PGM concentrates from the Bushveld Complex, built in 1929 at Government Areas Gold Mine  
Interior of the precious-metals refinery at Rustenburg Matthey Refiners  
Electrolytic recovery of copper
